GENERAL CHARACTERISTICS

- Power**** 8, 11, 24 W
- Power supply** 230Vac ± 10% 50/60Hz
- Operation** Maintained (SA), Not Maintained (SE), Public Performance (PS)
- Standard** EN 60598-1, EN 60598-2-2, EN 60598-2-22, EN 1838, EN 50172, EN 62034
- Protection grade** IP65, IK07
- Autonomy** 1h, 2h, 3h, up to 6h for the 8W version (settable with DIP switch)
- Working temp.** 0°C ÷ +40°C
- Mounting** wall, ceiling, recessed, suspended ceiling
- Housing** Grey Polycarbonate, RAL 7035
- Optics** Symmetrical, metallized antiglare Polycarbonate
- Diffuser** Transparent Polycarbonate
- Light source** LED

Logica LED

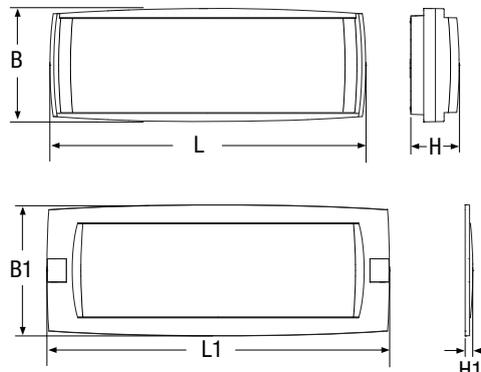

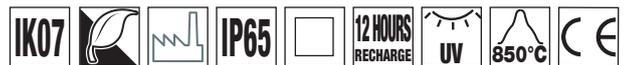

LED Emergency

This emergency lighting fixture is designed with a sophisticated electronic technology. LOGICA LED is a luminaire ready to be interfaced with LOGICA wired or LOGICA wireless Beghelli monitoring systems. When it's not controlled it works like an autotest (AT).

The circuit also allows the fixture to be customised to suit the necessities of use, adjusting its autonomy (1h/2h/3h, up to 6h for the 8W version) and, in the case of the SA maintained version, it can be switched to a PS version, adjusting the light intensity according to the requirements of the type of public establishment. The latter opportunity is a winner when the safety sign becomes the only visible element. It must therefore be immediately identifiable, elegant, non invasive and uniform in all fixtures.

Thanks to the symmetry and extreme uniformity of lighting that characterise the Logica LED, it can be installed, without a predefined orientation, on the wall, on the ceiling and recessed using the kit provided, complete with box and a frame that covers the wires.

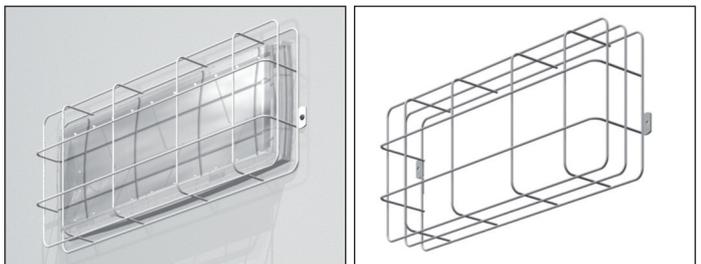

Inside the housing is a diffuser with dual reflection, which in turn contains two series of highly efficient LEDs that ensure unprecedented technical lighting output (up to 1500lm). The highly transparent Polycarbonate diffuser has been designed to seal the optics and obtain Protection degree IP65.
